

SILICON PLUS™

A revolutionary food supplement for Chicken

WHAT IS SILICON PLUS™ ?

SILICON PLUS™ is a unique formulation of 3 essential mineral compounds, combined in a bio-available form.

These mineral compounds are :

- Silicon
- Selenium
- Zinc

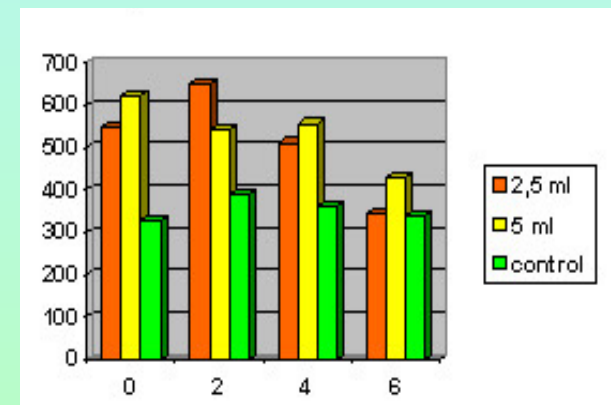

BENEFICIAL EFFECTS :

Silicon :

Has a beneficial effects on bone quality and improves the mineralization process in the bones. Silicon acts as a regulator for calcium and phosphorous uptake and will directly contribute to a healthy bone cortex and a well-calcified bone matrix.

Silicon also plays an important role in the formation of connective tissue and collagen.

X – Time in hours

Y – Silicon in Plasma (mcg/l)

BENEFICIAL EFFECTS :

Selenium :

Selenium is essential for the immune system and also acts as a strong anti-oxidant.

Zinc :

Zinc is essential for the enzymatic activity of the metabolism.

BENEFICIAL EFFECTS :

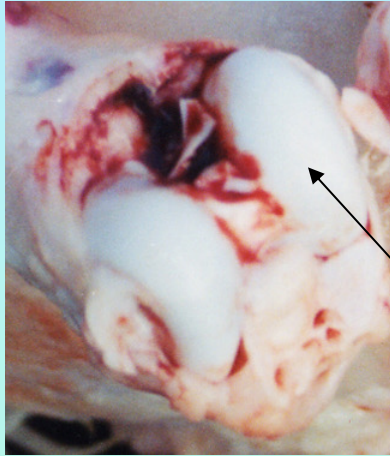

Scientific research has proven that adding these minerals to a daily diet improves the natural resistance. Animals will suffer less diseases, bone-related injuries and connective tissue injuries.

Trials have been done on chicken in order to show :

- better resistance
- improved bone formation and density
- improved formation of connective tissue
